World's first
zigzagging swimming pool cleaner

The motor-driven cleaner
makes the clear water
you have long awaited!

Full-automatic motor-driven
swimming pool cleaner robot

Hyper
Robo **MRX-06**

<Patented>

<http://www.yotsuyanagi.co.jp>

Motor-driven cleaner that zigzags through the pool for more than 3 hours

HyperRobo MRX-06 Features

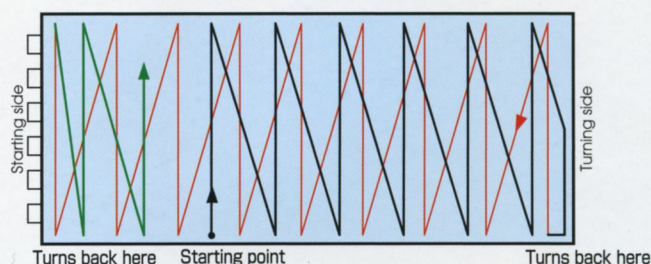

1. All you have to do is to put the robot in the swimming pool and switch it on, making it run along the short sides of the swimming pool in a zigzag motion.
2. It cleans the swimming pool automatically, zigzagging for more than 3 hours.
3. Unlike the random movement of other cleaners, the zigzagging of our robot does not kink or tangle the power cord and leaves very little rubbish behind.

Multi-N Touch-back System

- Our proprietary return sensor enables more than 3 hours of fully automatic movement. See the diagram.
- The trajectory of the Multi-N Touch-back System
The robot starts running towards the other side of the swimming pool. When the sensors on the front or back of the robot touch the side of the swimming pool, the robot changes direction and starts back, following the black N-shaped lines, until the robot touches the short side of the pool. Then, the robot turns and follows the red N-shaped lines. The robot repeats these movements again and again, completely cleaning the swimming pool.

Trajectory viewed from above

Specifications

Type	HyperRobo MRX-06
Drive system	24V DC motor drive
Trajectory	N-shaped zigzag trajectory
Power source	100V (Single phase)
Output	180W
Power consumption	Approximately 330W
Dimensions	63cm × 43cm × 41cm
Weight	18kg

Accessories

Power box	With a ground-fault circuit interrupter, timer, and 7 meters of cord	1 set
Power cord	Integrated floating cord (attached to the robot body)	30meters
Connecting plug	With a grounding clip	1 set
Grounding bar	With grounding wire	1 set
Bag filter	Made of nylon cloth, with a hose joint	1 set
Y-shape cord reel	Houses 30 meters of floating power cord	1 unit
Tools		1 set
Cart		1 unit

Cleaner Robot with accessories

- **Bag filter**
Filter bag, a consumable part, which is attached to the drain hole of the pump [Included as standard equipment]

Option

- **Extension cord**
Extends the cord between the power box and outlet for cleaning 50-meter and other large swimming pools

- **Y-shape cord reel**
Houses 30 meters of floating power cord, without tangling (Utility model patented) [Included as standard equipment]
